

REMARKS

Applicants thank the Examiner for the thorough consideration given the present application. Claims 1-10 are currently being prosecuted. The Examiner is respectfully requested to reconsider his rejections in view of the amendments and remarks as set forth below.

Allowable Subject Matter

It is gratefully acknowledged that the Examiner considers the subject matter of claims 1-10 as being allowable if claim 1 is amended to remove unnecessary periods. By way of the present amendment, the claims have been amended, including the removal of unnecessary periods in claim 1. Accordingly, claims 1-10 are now in condition for allowance.

Title of the Invention

The Examiner stated that the title of the invention is not descriptive and required a new title that is indicative of the invention to which the claims are directed. By way of the present amendment, the title has been changed to relate to all of the claims. However, Applicant submits that the title is now appropriate. If the Examiner prefers a different title, he is requested to contact the undersigned.

Abstract of the Disclosure

The Examiner objected to the Abstract as including the word quote "comprises". By way of the present amendment, Applicants are submitting a new Abstract which removes this word and also removes the phrase "is disclosed." Other minor changes have also been made to the Abstract. Accordingly, Applicant submits the Abstract is now in correct form.

Specification

Applicant has reviewed the specification and corrected a number of minor grammatical errors. Applicant submits the specification is now in better form. No new matter has been added by this amendment.

Claim Objections

The Examiner objected to claim 1 as having unnecessary periods. By way of the present amendment, Applicant has removed the phrases which titled the beginning of each paragraph and which included a period. Accordingly, this objection is overcome.

Applicants have also reviewing the remaining claims and made additional changes to place the claims in better form. However, the substance of the claims has remained the same and accordingly the claims are still considered to be allowable.

Conclusion

In view of the above remarks, it is believed that the specification and claims now fully meet the requirements of the Examiner. Accordingly, reconsideration of the objections and allowance of all the claims are respectfully requested.

In view of the above amendment, applicant believes the pending application is in condition for allowance.

Dated: **October 11, 2005**

Respectfully submitted,

By
